

# EARTECH TV AUDIO<sup>®</sup> FEATURES

- ✓ **It's affordable**  
Start enjoying shows in your own home with as much (or as little) sound volume as you want.
- ✓ **Crystal Clear**  
What you hear is crystal clear, CD quality sound.
- ✓ **Freedom to Move Around**  
You can get up and move around, even into another room, around corners, while still listening to the TV. Since it sends the sound as digital packets of information, EarTech TV Audio won't fade in and out like other systems do. The sound quality remains strong and clear up to 100 feet.
- ✓ **Expandable**  
Can pair unlimited number of receivers.
- ✓ **Induction Neckloop**  
For use with telecoil enabled hearing aids.
- ✓ **Compatibility**  
It works with all kinds of TVs, even older models. Optical connection for smart TVs. All the necessary cables and components are included in the system. And if you have any questions, we're just a phone call away.
- ✓ **Easy to Use**  
Balance and volume controls conveniently located on receiver.
- ✓ **Long Lasting Batteries**  
Uses Li-Polymer rechargeable batteries, so no expense of replacing batteries.
- ✓ **Lightweight and Comfortable**  
The headset style has pivoting earbuds, ensuring a comfortable fit even when you change positions. The neckloop is lightweight and has a safety closure.
- ✓ **Mute Function**  
Mute the TV but still hear it through the headset or neckloop.

**EARTECH TV AUDIO**

## Do others complain that the TV is too loud?

## Do you have difficulty understanding what is said with all that background music?

### Get back to TV the way it's supposed to be.

#### Say "Hello" to EarTech TV Audio.

This amazing, easy-to-use system delivers sound from your TV directly to your ears, at your own personal volume and tone settings. The sound is so crisp and clear, you'll wonder how you got along without it.

You can walk and move around, even into another room, while still listening to the TV.

#### Easy to set up & operate

The system includes one base unit (transmitter), one receiver (either headset or neckloop) and connection cables to work with any style of TV.

It's expandable too! You can use an unlimited number of receivers with the same transmitter. Imagine several people watching the same show and everybody with their own volume and balance controls.

#### How does it work?

The base unit/transmitter is connected to your TV. The transmitter sends a digital signal from your TV to a receiver that you wear. (See back panel for receiver options.)

#### Why choose EarTech TV Audio TV premium listening system?

EarTech TV Audio uses advanced digital audio technology, so it won't fade in and out like other systems. The sound quality remains strong and clear up to 100 feet, even through walls.

EarTech TV Audio broadcasts at 2.4 GHz, for wireless transmission of high bit rates without compression while minimizing interference from other electrical devices nearby.

#### Which style is best for me?

The receiver is available in two styles: stetho-style headset or neckloop.

The headset receiver is worn like a stethoscope, under the chin. The earpieces on the headset come in two sizes for a comfortable fit. The earpieces also pivot, maintaining that comfortable fit even when you change your body position.

The neckloop receiver is particularly versatile. You can use it with telecoil-equipped hearing aids or cochlear implant equipment. Even if you don't wear hearing aids you can still use the neckloop. It has a 3.5 mm jack that accommodates headphones, earbuds, in-ear-monitors, personal audio devices, and specialty induction couplers.

**Doctor-recommended for hearing aids with telecoils or anyone having difficulty hearing the TV.**

**EarTech TV Audio can also be used as an audio transmitter/receiver for small churches and classrooms, using multiple receivers.**

#### NOTE —

If you have a heart pacemaker, contact your physician or the manufacturer of the pacemaker to ensure that the neckloop system does not interfere with your pacemaker.

Get ready for an extraordinary TV listening experience. With EarTech TV Audio, you'll hear what you see and love what you hear!
